MEETING AGENDA

1. CALL TO ORDER
2. ROLL CALL
3. APPROVAL OF MINUTES
 - a. *Approval of meeting minutes from January 27, 2021.
 - b. *Approval of meeting minutes from January 28, 2022 Colusa Groundwater Authority/Glenn Groundwater Authority Joint Executive Committee.
4. PERIOD OF PUBLIC COMMENT

Members of the public are encouraged to address the GGA Executive Committee on items relevant to the GGA. Public comments are limited to no more than 5 minutes. No action may be taken on public comments.
5. STAFF UPDATES
6. *APPROVE 2022 GGA EXECUTIVE COMMITTEE MEETING SCHEDULE
7. WATER CONSERVATION CAMPAIGN
 - a. Discussion on approach for the water conservation campaign.

b. *Approve materials related to the water conservation campaign.

8. EXECUTIVE COMMITTEE MEMBER REPORTS AND COMMENTS

9. NEXT MEETING

10. ADJOURN

*Indicates Potential Action Item

A complete agenda packet, including back-up information, is available for public inspection during normal work hours at 225 N Tehama St., Willows, CA 95988. After posting of this Meeting Agenda, the public may request copies of support information for public agenda items listed.

In compliance with the Americans with Disabilities Act, The Glenn Groundwater Authority will make available to persons with a disability disability-related modification or accommodations. If requested, this document and other agenda materials can be made available in an alternative format for persons with a disability who are covered by the Americans with Disabilities Act. Contact Lisa Hunter at 530-934-6540.

CERTIFICATION: Pursuant to Government Code §54954.2 the agenda for this meeting was properly posted on or before 1:30 pm on July 24, 2022.

**GGA Executive Committee
Meeting Packet**

July 27, 2022

Staff Report

To: GGA Executive Committee

Agenda Item: 3. APPROVAL OF MINUTES

Date: 7/27/22

Background

The meeting minutes from the January 27, 2021 GGA Executive Committee meeting and the January 28, 2022 CGA/GGA Joint Executive Committee meeting have been prepared for review.

Proposed Recommendation

Approve meeting minutes from the January 27, 2021 GGA Executive Committee meeting and the January 28, 2022 CGA/GGA Joint Executive Committee meeting.

Attachments

- January 27, 2021 draft meeting minutes
- January 28, 2022 draft meeting minutes

MINUTES

Glenn Groundwater Authority Executive Committee

January 27, 2021

1:30 PM

Teleconference

Pursuant to Governor Newsom's Executive Orders N-29-20 this meeting was conducted by teleconference. The meeting was accessible via telephone, computer, smartphone, or tablet and remote participation was highly encouraged.

Committee Members Present:	Agency Representing:
<input checked="" type="checkbox"/> John Amaro	Glenn-Colusa Irrigation District
<input checked="" type="checkbox"/> Gary Hansen	City of Willows
<input checked="" type="checkbox"/> Leslie Nerli	Glide Water District

Others in attendance:

Lisa Hunter, GGA/Glenn County; Valerie Kincaid, GGA Counsel; David Kehn, CalWater/GGA TAC; John Campbell; Julia Violich

1. CALL TO ORDER

John Amaro called the meeting to order at 1:30 pm.

2. ROLL CALL

Lisa Hunter took roll call which is indicated above.

3. APPROVAL OF MINUTES

a. Approval of meeting minutes from December 3, 2020

A motion was made to approve the December 3, 2020 meeting minutes as submitted.

Motion: Leslie Nerli, Second: Gary Hansen, Vote: Unanimous

Roll Call Vote

John Amaro: AYE

Gary Hansen: AYE

Leslie Nerli: AYE

4. PERIOD OF PUBLIC COMMENT

None.

5. STAFF UPDATES

Ms. Hunter stated the annual audit is being reviewed by CliftonLarsonAllen and should be ready for the February GGA Board meeting. She noted that inter-basin coordination is continuing and reports will be given when there are updates. Ms. Hunter and David Kehn, TAC representative, will be working together to tee up discussion and recommendation items from the TAC to the GGA Board to facilitate education, discussion, and direction from the Board to the TAC. She mentioned that Management Areas (MA) continues to be a topic of interest and the

topic will be brought to the Board for discussion. Ms. Hunter also stated that she is working on gathering the on-boarding materials for the new members and hopes to have packets to them next week.

There were questions and additional discussion regarding MAs. It was clarified that the Board item would likely be a discussion item potentially with direction to the TAC rather than an action item. Ms. Nerli suggested having materials prepared for the Board to walk them through the pros and cons of MAs. Ms. Hunter shared Davids Engineering is preparing a memo and potentially other materials to facilitate Board discussion. A draft of the memo was shared at the January 26, 2020 Colusa Groundwater Authority Board meeting.

Ms. Hunter shared some common themes of support for MAs such as a desire for local control and protection and there is concern with future pressure on surface water allocations that may necessitate an area to pump groundwater that did not historically use groundwater. Ms. Kincaid suggested it would be helpful to understand the conditions in the basin in relation to the physical attributes of the basin. She also mentioned that DWR requires a significant amount of information if MAs are developed and the rationale for selecting the MAs. Ms. Hunter also mentioned some think of MAs as a way to more efficiently fund projects and management actions. Mr. Amaro noted that some districts are feeling pressure on surface water supplies and they may need to use groundwater. There is a lot of groundwater development in the “white areas”. The districts want to protect what they are recharging. Ms. Kincaid also noted that if a district decides to create an MA, it does create, by default, an area outside of the MA, which is its own MA. Discussions would need to take place to work through that.

Ms. Nerli asked if MAs could be developed later through an amendment process. Ms. Kincaid stated GSPs can be amended at any time. There are also five year required updates for GSPs and MAs could be added to that process. Ms. Nerli suggested if MA delineation is unclear, table the discussion and continue with completing the GSP and revisit the topic in order to submit the GSP on time.

6. COLUSA SUBBASIN GROUNDWATER SUSTAINABILTY PLAN

- a. Discuss GSP development, activities, and outreach**
- b. Receive update on GSP Development Grants (Proposition 1 and Proposition 68)**
- c. Receive update on Project Agreements**

Ms. Hunter mentioned the Well Monitoring Pilot Program workshop was held January 25, 2021. Applications are due February 26, 2021. This program is expected to fund approximately six projects. The Projects and Management Actions (PMA) solicitation form is available on the website. The consultant team will compile responses received and use these submittals to inform the PMA section of the GSP. All the projects will be included in an Appendix in the GSP. The consulting team has also developed an “Administrative Record” tracking sheet. All comments related to GSP development will be included in this spreadsheet which will be available for the Board members and the public to view. Regular updates will be provided at Board meetings. Comments may be discussed further if warranted. Ms. Hunter notes she did not have significant updates on the **grants and Project Agreements**. The grant invoice and progress report will be submitted to DWR this month (January) by the CGA and she coordinates with Mary Fahey on this.

7. THE NATURE CONSERVANCY AND DEPARTMENT OF WATER RESOURCES MULTI-BENEFIT RECHARGE PROJECT

- a. *Discussion and possible recommendation to the GGA Board on TNC/DWR Multi-benefit Recharge Project partnership.**

Mr. Amaro mentioned a presentation on this topic was given at the last GGA Board meeting.

Ms. Hunter met with the team yesterday to narrow down potential focus areas by reviewing particular criteria. The most promising areas for inclusion in the pilot project are in the Orland-Artois Water District, Glenn-Colusa Irrigation District, Glide Water District, and Kanawha Water District areas. She sent emails to the managers of the districts to facilitate an initial conversation.

Valerie Kincaid concurred the potential project sounds promising and could be a win-win situation. She indicated she had two main questions that should be clarified. The first relating to CEQA compliance and the second regarding water ownership. She elaborated that recharge is only considered a beneficial use of water if it is extracted and put to beneficial use and that recharge is not by itself considered a beneficial use of water in California. There was additional discussion on beneficial uses of water and the complexity of water rights in California. There was agreement that there is a lot to consider when thinking about projects such as this.

Ms. Nerli made a motion to ask the Board for permission for Valerie Kincaid to reach out to TNC and DWR to ask questions in order to better evaluate this opportunity. After further discussion, there was general agreement to direct Ms. Kincaid and Ms. Hunter to reach out to TNC and DWR staff to address questions that have been raised and to bring the topic back to the Board for further discussion. Ms. Nerli rescinded her previous motion.

There was also agreement that if the GGA were to participate in this program the Board needs to have a thorough understanding of the program, but a formal agreement between TNC and the GGA was probably not necessary.

8. DISCUSS 2021 GOALS AND PRIORITIES

Ms. Hunter encouraged the Board members to share any thoughts they have on priorities for this year. The GSP is the top priority, but any guidance on other items to help support the needs of the GGA is appreciated. She noted this could be a discussion for today or for a later meeting.

Ms. Nerli suggested re-addressing this topic at the next meeting with materials to support the discussion, such as a schedule and update on the status of the various budgets and agreements. Mr. Hansen agreed that the GSP is number one priority and needs to remain the top priority. Other items can be brought forward as needed, but stick with the simple list of GSP completion. He cautioned about spreading everyone too thin with so much going on and suggested focusing on the GSP and working on other tasks down the road. Mr. Amaro agreed that the GSP is the priority and we need to keep on top of it. Once the GSP is complete, the other items can be discussed.

9. EXECUTIVE COMMITTEE MEMBER REPORTS AND COMMENTS

Mr. Hansen said he was new to the committee and looks forward to working with everyone.

Mr. Amaro noted the dry conditions this year and he is concerned with drought impacts and the pressure on the groundwater this year.

10. DISCUSS ADDITIONAL POTENTIAL ITEMS TO BE ADDED TO THE NEXT GGA BOARD MEETING AGENDA

Mr. Hansen asked if there was anything needed to help the TAC move forward. Ms. Hunter stated she will be working with David Kehn to add potential items to the Board agenda and frame up the relevant discussions.

No additional items were added.

11. NEXT MEETING

The next meeting is scheduled for March 24, 2021 at 1:30 PM.

12. ADJOURN

The meeting was adjourned at 2:32 PM.

DRAFT

CGA/GGA Joint Executive Committee Meeting

MEETING MINUTES

January 28, 2022 | 9:00 a.m.

Due to safety concerns and directives from the Governor and Federal Government related to COVID-19,

This meeting was held remotely ONLY.

1. Call to Order, Roll Call, and Introductions

John Amaro, Glenn Groundwater Authority Chair, called the meeting to order at 9:02 a.m.

In Attendance:

Committee Members:

GGA: John Amaro, Gary Hansen

CGA: Denise Carter, Hilary Reinhard, Darrin Williams

Other in Attendance: Ashlee Veneman, Grant Carmon (GGA), Mallory Serrao (Provost & Pritchard), Jenny Sheer, Joe Turner, Greg Plucker, Brandon Davison (DWR), Holly Reimers, Lisa Porta

2. Period of Public Comment

No public comment was heard.

3. Colusa Subbasin Groundwater Sustainability Plan Implementation

- Lisa Hunter, GGA Program Manager, stated the Groundwater Sustainability Plan (GSP) is moving to the implementation phase and this discussion is intended to serve as a catalyst for GSA coordination during GSP implementation.
 - a. GSA Staffing- Discussion
 - Denise Carter noted that Mary Fahey is no longer with the CGA. Colusa County will no longer be providing staffing services to the CGA. The CGA has formed an ad hoc committee and will develop a Program Manager description. The CGA Board is looking at options for filling the position including recruitment for its own employee or utilizing consultant services.
 - b. Outreach and Engagement Support-Discussion
 - Ms. Hunter introduced the item stating that the contract for Consensus and Collaboration Program (CCP), sub-consultant to Davids Engineering, will be ending soon. She asked if there is a desire for consultant support for outreach and engagement activities. Tasks could include social media updates, basin-wide flyers, and agendas for joint GSA meetings.

- Mr. Amaro asked if these services would be funded through grants or self-funded. Ms. Hunter responded that the current grant funds will be expended soon. DWR has a Facilitation Support Services (FSS) program that could be applied for with a specific scope of work. Otherwise, the outreach support would be self-funded. Ms. Carter added that it is necessary to consider what topics need to be communicated to the constituents over the next year or two, and suggested drought communications may be an example of outreach topics. Ms. Reinhard stated that communication about projects is better done by local advocates and further stated facilitation support may not be needed at this point.
- Mr. Amaro supported local outreach rather than facilitation and suggested a possible public meeting once every four months to share information about the drought and related actions. Gary Hansen supported local outreach and asked if CCP might be available on an as-needed basis. He further stated he supports press releases and occasional public meetings as well. Ms. Carter suggested checking into a retainer-type agreement with CCP.
- Darrin Williams spoke to the demands on time for board member participation and suggested having as point person on staff for the CGA to conduct outreach and engage with the public on a regular basis. He supports a local approach to outreach rather than a consultant. There was general agreement with these statements.
- Ms. Hunter asked if there is interest in pursuing a FSS agreement to help prepare outreach items and meetings and provide staff support to the outreach process. Ms. Carter supported pursuing FSS.
- Mr. Hansen stated the City of Willows uses Regional Government Services for assistance in finding candidates with specialized skills and encouraged the CGA to consider this avenue for filling the Program Manager position.

c. Annual Reports- Update and Discussion

- Ms. Hunter stated the Annual Report is being developed by the consultant team and is due April 1. The project is on track to be completed on time. She further stated an update on the Annual Report will likely be given at a Joint TAC meeting.
- Ms. Hunter encouraged discussion on annual reports on a broader scale. A Request for Proposals could be issued in the summer in order to have a consultant in place by the fall to complete the work by the April 1 deadline. An agreement could include the option to extend for multiple years. Discussion ensued on Annual Report contents, timing, and deadlines. It was clarified that Davids Engineering is completing the Water Year 2021 Annual Report that is due April 1, 2022.

d. Funding and Financing Mechanisms- Discussion

- Ms. Hunter stated funding and financing are critically important for both GSAs and there have been commitments to review the funding mechanisms during GSP

implementation. She noted there is a small amount of funding remaining in the grant to have one additional meeting with consultant support to outline a roadmap and options to consider. An item is being prepared for a consultant presentation at a Joint Board meeting to facilitate discussion on this topic. Additional discussion will take place on how the GSAs may choose to move forward. Considerations may include a basin-wide approach to funding, each GSA handling its own processes completely, or a hybrid where there is coordination on a consistent approach, but each GSA completes its own process. Ms. Hunter encouraged feedback to better frame up the discussion for the Joint Board meeting. Ms. Carter stated the CGA has designated a long-term funding ad hoc committee. She emphasized the importance of meeting jointly, and having separate GSA discussions, and sharing information between the GSAs. The timeline for fees to be included on the county's tax roll was reviewed, noting an August 10 deadline to submit files to the county.

- Mr. Amaro asked about the timing of meetings and length of time to complete the process. Ms. Hunter reviewed the components and stated one year may be a good target for how long the process might take. Mallory Serrao confirmed the timeframe, but stated additional considerations may affect the length of time needed.
- Mr. Williams stated the list of projects in the GSP will need to be reviewed to determine which projects move forward and which might be the responsibility of CGA and GGA which will influence the funding mechanisms. He suggested the need to fine tune the budget and consider project costs as well as administrative costs. Ms. Reinhard agreed stating the funding of projects is the most complicated part and it is important to know the amount of funding needed. She also emphasized the need for outreach. She further stated that the Colusa Subbasin is one of the largest in the state and tying the GSAs together by using the same funding mechanism might be more complicated and the GSAs may lose flexibility. Mr. Williams spoke in favor of special projects being funded by beneficiaries of the project. He further spoke to the diversity of the subbasin. Ms. Carter spoke of needing to consider general overhead of running agency including annual reports and special studies, and also to policy decisions on how special projects get paid for, how to determine the beneficiaries of a project, and whether projects are funded by the lead agency? Mr. Amaro spoke in favor of focusing discussion on GSA administration and some focus on special studies, and that projects should be grant funded when possible and funded by the areas benefitting from the project. Discussion ensued on structuring special projects to include beneficiaries and how the cost of the special project will be recovered.

e. Next Steps- Discussion

- Ms. Hunter encouraged discussion on what would be helpful in order to continue coordinating, for instance, is there a desire for additional Joint Executive Committee meetings.

- Mr. Williams suggested a joint meeting to begin looking at projects in the GSP and brainstorm how we might start allocating project costs, assigning beneficiaries, and build a roadmap for implementation.

4. Member Reports and Comments

- Ms. Carter spoke to the importance of reviewing Projects and Management Actions (PMAs) in preparation for the grant funding. Brandon Davison encouraged collectively prioritizing the PMAs and know which are the most shovel-ready projects. Ms. Reinhard asked if only the critically over drafted basins are being funded. Ms. Hunter shared that critically over drafted basins are being funded in Round 1 and the Round 2 funding solicitation is expected to be available in the Fall of 2022 which the Colusa Subbasin could apply for and spoke in favor of beginning to prepare for that application soon.
- Mr. Amaro summarized that the board needs to meet more often in a joint setting and start prioritizing projects and other topics.
- Mr. Amaro opened the floor for public comments; whereby, no comments were heard.

5. Adjourn

- The meeting adjourned at 10:02 a.m.

DRAFT

Staff Report

To: GGA Executive Committee

Agenda Item: 6. APPROVE 2022 GGA EXECUTIVE COMMITTEE MEETING SCHEDULE

Date: 7/27/22

Background

In 2021, the GGA Executive Committee was scheduled to meet on the 4th Wednesday of every other month. Due to a lack of agenda items, the committee only met one time, in January 2021. Using the 2021 schedule as a default for the 2022 schedule, three meetings have been cancelled in 2022. The committee held a joint meeting with the CGA Executive Committee in January 2022.

Staff recommends reducing the number of scheduled regular Executive Committee meetings. Special meetings may be called as needed.

Proposed Recommendation

Approve 2022 GGA Executive Committee Meeting Schedule Option 2.

Attachments

- Glenn Groundwater Authority Executive Committee 2022 Meeting Schedule Options (Draft 7/21/22)

Glenn Groundwater Authority Executive Committee 2022 Meeting Schedule

Option 1 (Note: this was the default option based on the 2021 schedule)

The GGA Executive Committee will meet generally on the 4th Wednesday every other month at 1:30 pm. Meetings will be held at the Glenn County Planning and Community Development Services Agency located at 225 North Tehama Street, Willows, CA 95988. Exceptions are noted below.

- ~~January 26, 2022~~ Cancelled
- January 28, 2022 (Joint with Colusa Groundwater Authority): Teleconference Only
- ~~March 23, 2022~~ Cancelled
- ~~May 25, 2022~~ Cancelled
- July 27, 2022
- September 28, 2022
- November 23, 2022

Option 2

The GGA Executive Committee will meet generally quarterly on the 4th Wednesday of the month at 1:30 pm. Meetings will be held at the Glenn County Planning and Community Development Services Agency located at 225 North Tehama Street, Willows, CA 95988. Exceptions are noted below.

- ~~January 26, 2022~~ Cancelled
- January 28, 2022 (Joint with Colusa Groundwater Authority): Teleconference Only
- ~~March 23, 2022~~ Cancelled
- ~~May 25, 2022~~ Cancelled
- July 27, 2022
- October 26, 2022

Staff Report

To: GGA Executive Committee

Agenda Item: 7. WATER CONSERVATION CAMPAIGN

Date: 7/27/22

Background

At the March 16, 2022 meeting, the GGA Board requested a discussion item to consider supporting or developing a water conservation campaign or another method of encouraging or requiring water conservation, particularly in areas experiencing significant groundwater level declines. This could include an educational or awareness campaign or specific groundwater extraction limitation requirements.

At the May 9, 2022 meeting, the Board discussed potential options and provided general support for outreach related to water conservation. The Board directed staff to continue exploring this option and bring recommendations to the Board for further discussion and/or action.

At the June 14, 2022 meeting, staff provided information to the GGA including considerations and examples of outreach materials. At that meeting, there was general consensus that an educational or awareness campaign focused on encouraging water conservation was more appropriate than mandatory actions at this time. A request was also made to more explicitly include agricultural water use conservation in outreach materials.

At the July 11, 2022 meeting, the Board continued discussion on approaches to encouraging water conservation. It was generally agreed that a Press Release may be the most efficient and effective route. Other options could include social media or other electronic means. The idea to focus on the mission of the GSP and what the GGA is doing resonated with many members.

Direction was given to the Executive Committee to finalize the materials for the water conservation campaign.

Proposed Recommendation

Approve the materials related to the water conservation campaign.

- Draft Press Release
- Draft website mock-up

Water Conservation Press Release **DRAFT**

The Glenn Groundwater Authority (GGA) is encouraging you to help our groundwater basin by conserving water. Conserve at home. Conserve at work. Conserve on the farm. We are experiencing a significant drought and we need your help. Eight of the last ten years have been classified as below normal, dry, or critical based on the Sacramento Valley Water Year Hydrologic Classification. The Northern Sierra Precipitation 8-Station Index states our region is only at 79% of average precipitation this year. The U.S. Drought Monitor shows over 97% of Glenn County is in Extreme Drought.

The GGA is the Groundwater Sustainability Agency managing the Glenn County portion of the Colusa Subbasin. This covers the area generally south of Stony Creek, east of the coast ranges, west of the Sacramento River, and north of the Glenn-Colusa County line. In coordination with the Colusa Groundwater Authority, the GGA submitted the Colusa Subbasin Groundwater Sustainability Plan (GSP) as required by the Sustainability Groundwater Management Act in January 2022. The GSP is a long-term, comprehensive, dynamic plan that will guide how groundwater is managed in the Colusa Subbasin. The goals of the GSP are to maintain locally-managed sustainable groundwater resources to preserve and enhance the economic viability, social well-being, and culture of all who use groundwater, while avoiding undesirable results. What constitutes an “undesirable result” is quantified in the GSP for the required sustainability indicators which include, for example, groundwater levels and land subsidence. Conditions are monitored throughout the subbasin and measured relative to the criteria set within the GSP.

Basin conditions are evaluated at least annually during the development of the required Annual Report. The Annual Report submitted in April 2022 indicated that groundwater levels have generally dropped since 2020, especially around Orland and Artois. Since 2015, land subsidence has occurred in various areas, but most prominent between Orland and Artois with up to -1.5 feet of vertical displacement. It is unclear how much of this subsidence is permanent.

How is the GGA helping during drought? The GSP includes a list of Projects and Management Actions that can be implemented to help reach and maintain sustainable groundwater conditions. The GGA is evaluating these projects and longer-term options to enhance drought resiliency. Immediate term solutions are being sought by Glenn County, cities, and local water providers. If you are experiencing water supply issues, be sure to report your issues to Glenn County or the California Department of Water Resources. There may be an assistance program that fits your circumstances. The link to report water insecurities can be found on our website. The GGA is also pursuing planning for groundwater recharge projects, has added additional monitoring for land subsidence, and is preparing for a grant opportunity that could provide funds for on-the-ground projects.

The GGA supports the actions taken by local municipal water suppliers to encourage water conservation. The City of Orland implemented Stage 2 of the Water Conservation and Shortage Contingency Plan effective May 1, 2022. This includes limiting watering lawn and landscape to 3 days per week between 8 p.m. and 8 a.m. and implements a Stage 2 tiered rate structure. Cal Water, serving residents in the City of Willows, implemented Stage 2 of Cal Water’s Water Shortage Contingency Plan on May 23, 2022. Restrictions include limitations on outdoor watering to 2 days per week between 6 p.m. and 8 a.m. and increased water waste penalties.

If you are a resident outside of these water service areas, we encourage you to implement a limited watering schedule and to reduce water waste. Fix leaks. Wash vehicles only with a hose that has a shutoff

nozzle or similar device. Do not put water on driveways and sidewalks, unless for health and safety purposes. Do not water outdoor landscape within 48 hours after measurable rainfall. Be creative in finding your own solutions!

Local agricultural producers have also been affected by drought. Surface water allocations have been significantly reduced or eliminated across the subbasin, with some receiving no surface water at all. In many cases, annual crops have been fallowed or fewer acres planted while trees and other permanent crops are being irrigated sparingly. Agricultural water users are similarly encouraged to utilize best management practices and conserve water as much as possible. Utilize your surface water supplies if you have them and minimize groundwater pumping. Coordinate with neighbors, when possible, to minimize possible well interference. [Visit our website for links to additional resources.](#)

We challenge you to do your part in helping to conserve our precious water resources. No matter what you use water for, we are all in this together and every drop counts! Visit our website at [XX](#) to access additional tips, information, and resources.
